*Admission to the museum can be earned through participation in the Showcase.

FREE ADMISSION

Badges and raffle prizes are open to all young people who attend

Under the banner of Chicago Summer of Learning, thousands of young people have spent their summer exploring the themes of Science, Technology, Engineering, Art and Math (STEAM). The City of Chicago has partnered with more than 100 youth-serving organizations, colleges and universities, museums and cultural institutions, philanthropists, businesses, and citizens to help its youth make the whole summer count. As a result, Chicago's young people have enjoyed opportunities to sharpen their skills in sports and reading, archeology and architecture, poetry, film-making, fashion design and more – all while exploring their city, earning digital badges, and leveling up to new challenges!
