JOHN D. AND CATHERINE T. MACARTHUR FOUNDATION

FINANCIAL STATEMENTS DECEMBER 31, 2014 and 2013

Crowe Horwath LLP Independent Member Crowe Horwath International

INDEPENDENT AUDITOR'S REPORT

The Board of Directors John D. and Catherine T. MacArthur Foundation

Report on the Financial Statements

We have audited the accompanying financial statements of John D. and Catherine T. MacArthur Foundation (the Foundation), which comprise the statements of financial position as of December 31, 2014 and 2013, and the related statements of activities and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Foundation's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Foundation's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of John D. and Catherine T. MacArthur Foundation as of December 31, 2014 and 2013, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Cash and cash equivalents at beginning of year	4,148		2,771
Cash and cash equivalents at end of year	\$ 2,926	\$	4,148

The accompanying notes are an integral part of the financial statements.

December 31, 2014 and 2013

1. Organization

The John D. and Catherine T. MacArthur Foundation is a private, independent grantmaking foundation that supports creative people and effective institutions. MacArthur is one of the nation's largest independent foundations. Through its grantmaking MacArthur works to defend human rights, advance global conservation and security, make cities better places, and understand how technology is affecting children and society. Through the support it provides, the Foundation fosters the development of knowledge, nurtures individual creativity, strengthens institutions, helps improve public policy, and provides information to the public, primarily through support for public interest media.

2. Summary of Significant Accounting Policies

The Foundation prepares its financial statements on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America. The Foundation's significant accounting policies are as follows:

Cash and Cash Equivalents

Cash and cash equivalents held by the Foundation for use in its operations include temporary investments with original maturities of three months or less. Cash and cash equivalents used by the Foundation in managing its investments are reported in investments.

Investments

Investments are reported at fair value. Fair value is based on quoted market prices when available or quoted market prices of comparable instruments when prices are not available. For alternative investments in limited partnerships and other similar instruments, the fair value is based on valuations provided by external investment managers, including net asset values as of the most recent audited or interim financial statements. The net asset values provided by external managers are based on the underlying securities and investment holdings, which may be valued at quoted market prices, based on comparable instruments, at appraised value, or by discounted cash flows. The external managers' valuations are reviewed by Foundation management. The Foundation believes the carrying amount of these financial instruments is a reasonable estimate of fair value. Because some alternative investments are not readily marketable, their estimated value is subject to uncertainty.

Investment administrative expenses are included in investment expenses. In addition, investment management fees reported at \$15.8 million and \$16.1 million in 2014 and 2013, respectively, are netted against investment income.

December 31, 2014 and 2013

Program-related Investments

In accordance with Section 4944 of the Internal Revenue Code, the Foundation is permitted to make investments that are related to its philanthropic programs. These investments are in the form of loans and equities and are anticipated to have a less than market return. In the year of the investment, the Foundation receives a credit toward its distribution requirement. Return of principal of program-related investments increases the Foundation's distribution requirement in the year of receipt. These investments are generally recorded at cost net of appropriate reserves for collectability.

Outstanding program-related investments totaled \$174.4 million and \$175.4 million as of December 31, 2014 and 2013, respectively. Reserves are based on a review of borrowers' credit risks, including consideration of the financial strength of borrowers, the nature of the investments, payment history, and current economic conditions. The Foundation has reserved \$31.6 million and \$37.1 million as of December 31, 2014 and 2013, respectively. Investments written off as bad debt totaled \$2.0 million in 2014 and \$5.7 million in 2013. Loans more than 30 days past due totaled \$121 thousand as of December 31, 2014, and there were no loans more than 30 days past due as of December 31, 2013. The Foundation had open program-related investment commitments of \$14.0 million and \$15.3 million as of December 31, 2014 and 2013, respectively.

Assets Held for Charitable Purposes

The Foundation holds certain assets, primarily real estate, for charitable purposes. The Foundation receives a credit toward its distribution requirement equal to the fair value, as determined by appraisal, of the assets at the time they are put into charitable use.

Grants

Grant awards are expensed when approved. Grants payable that are expected to be paid in future years are recorded at the present value of expected future payments. The Foundation discounted grants payable using an average rate of 1.40 percent and 1.27 percent as of December 31, 2014 and 2013, respectively.

Federal Taxes

The Foundation has received a determination letter from the Internal Revenue Service indicating that it qualifies as a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code and is not subject to federal income taxes except for income from its unrelated business activities. Under Section 4940(a) of the Internal Revenue Code, a federal excise tax of 2 percent is imposed on the Foundation's net investment income and realized capital gains.

Deferred tax expense results from certain income and expense items, primarily unrealized gains or losses on investments, being accounted for in different time periods for financial statement purposes than for federal excise and income tax purposes. Appropriate provisions are made in the financial statements for deferred taxes in recognition of these timing differences.

December 31, 2014 and 2013

Employee Retirement Plan

The Foundation sponsors a defined contribution retirement plan for its eligible employees. Plan participants are fully vested after one year of service. The Foundation is current with its contributions to the plan. Employer contributions to the plan totaled \$3.0 million and \$2.8 million in 2014 and 2013, respectively.

Post-retirement Benefits

The Foundation provides health care and life insurance benefits to certain of its retired employees and their eligible dependents. The Foundation has recorded a liability for post-retirement benefit obligation of \$46.8 million and \$41.2 million as of December 31, 2014 and 2013, respectively.

Estimates

The preparation of the Foundation's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Reclassifications

Certain amounts in the prior year financial statements have been reclassified, with no effect on net assets or change in net assets, to conform to the current year presentation.

3. Investments

The Foundation's investment objective is to provide a return on its investments sufficient to fund in perpetuity the grants, other qualifying distributions, and operating costs of the Foundation. Investments are made in accordance with an asset allocation policy with the objective of earning a 5 percent real return over time and preserving the portfolio corpus in real terms. Assets in the investment portfolio may include marketable debt and equity securities traded on public exchanges anywhere in the world; foreign currency investments; private debt and equity securities and partnerships; venture capital partnerships; commodities, including oil and gas assets; real estate; derivative instruments; and cash and cash equivalents. The investment portfolio is diversified to minimize the concentration risk of any single security, class of securities, or asset class.

December 31, 2014 and 2013

Investments at fair value as of December 31, 2014 and 2013, are as follows (000s omitted):

	2014	2013
Public Investments		
Equities	\$2,101,738	\$1,451,302
Fixed income	547,374	581,495
Marketable alternatives	1,096,307	1,080,322
Real estate	176	-
Cash and cash equivalents	84,479	315,995
Private Investments		
Equities	970,242	1,018,283
Fixed income	526,592	530,270
Real estate	507,842	660,100
Energy and commodities	447,472	500,136
Total investments	\$6,282,222	\$6,137,903

Public investments include cash and cash equivalents, marketable equity and fixed income securities that are regularly traded on public exchanges, and public securities held by funds structured either as corporations in which the Foundation owns stock or as partnerships in which the Foundation is a limited partner. Private investments include equity and fixed income investments that are not regularly traded and private securities held by corporations in which the Foundation owns stock or held by partnerships in which the Foundation is a limited partner.

The Foundation's exposure in limited partnership investments and certain corporate equity investments, which totaled \$4,835.4 million and \$4,637.6 million as of December 31, 2014 and 2013, respectively, is limited to its partnership or equity investments in these entities.

In addition to the cash and cash equivalents held by the Foundation for investment, the Foundation's investment managers held cash totaling \$707.4 million and \$278.1 million as of December 31, 2014 and 2013, respectively, in the course of implementing their investment strategies. Cash held for investment by those managers totaled \$5.7 million and \$35.1 million as of December 31, 2014 and 2013, respectively. Cash held at the direction of the Foundation associated with derivative strategies totaled \$653.5 million as of December 31, 2014 (of which \$572.6 million is included in Public Equities and the preponderance of the balance in Public Fixed income), and \$209.1 million as of December 31, 2013. Cash held as required margin for outstanding securities trades totaled \$48.2 million and \$33.9 million as of December 31, 2014 and 2013, respectively. The amount of cash held on the reporting dates is a function of the timing of executing the investment strategies.

The Foundation had pending trade purchases of \$5.5 million and \$3.5 million as of December 31, 2014 and 2013, respectively. The Foundation had pending sales of \$3.5 million and \$28.4 million as of December 31, 2014 and 2013, respectively. These amounts are included in investments.

December 31, 2014 and 2013

Through a repurchase agreement program managed by a third-party investment manager, the Foundation loans cash included in its investment portfolio overnight and the agreements mature the following day. Borrowers are required to maintain collateral, held at a third party custodian, equal to 102 percent of the loan, with collateral in the form of U.S. Treasury obligations. There were no repurchase agreements in 2014 and the average cash loaned overnight was \$172.0 million for 2013. No loans were outstanding as of December 31, 2014 and 2013.

Derivative Instruments

The Foundation's investment strategy utilizes financial instruments that involve, to varying degrees, elements of market risk, credit risk, currency risk, and counterparty risk. These instruments are held in separately managed accounts, limited partnerships, and other fund structures. Financial instruments include securities sold but not yet purchased and derivative contracts including forward currency contracts, futures, options, and swaps. All of the Foundation's derivative positions are marked to fair value as a component of investment income. The fair value of these instruments is included in investments.

In the opinion of the Foundation's management, the use of financial derivative instruments in its investment program is appropriate and customary for the investment strategies employed. Using these instruments may reduce certain investment risks and add value to the portfolio.

The Foundation enters into forward currency contracts, futures, options, and swaps for tactical investment and hedging purposes. Currency forward contracts and options may be used to hedge non-U.S. dollar exposure in foreign investments or to take positions in managed currency portfolios. Futures and swap contracts may be used to rebalance asset categories within the portfolio or to manage market exposures in portfolios. Futures, options, and swaps may be used to hedge or leverage positions within certain risk parameters.

The net notional and fair values of forward contracts, futures, options, and swaps as of December 31, 2014 and 2013, are as follows (000s omitted):

	201	4	2013					
	Net Notional <u>Value</u>	Fair Value	Net Notional <u>Value</u>	Fair Value				
Forward contracts	\$ 13,904	\$ (1,067)	\$ (21,344)	\$ (126)				
Futures	1,181,124	-	992,492	-				
Options	190,714	6,810	-	-				
Swaps	1,879,074	(29,615)	2,038,401	29,447				
Total	\$ 3,264,816	\$ (23,872)	\$ 3,009,549	\$ 29,321				

The Foundation is a seller of certain credit default swap contracts, which are included in the net notional value and fair value of swaps. These contracts provide the Foundation exposure to, or hedge against, a diversified portfolio of credit risks through a liquid, transparent, and standardized basket of securities. The reference obligations under the Foundation's credit default swap contracts are composed of baskets of securities sharing similar characteristics. The individual baskets to which the Foundation has exposure under separate contracts are high-yield securities, emerging markets and investment grade debt. The number of individual, underlying securities referenced in each of the contracts range from 14 to 125. The Foundation is required to make payments that are proportionate to the overall notional exposure as credit events occur for individual securities in the referenced baskets. The notional value of these

December 31, 2014 and 2013

investments reflects the maximum amount of future payments (undiscounted) that the Foundation could be required to make should each individual security in the referenced basket experience a credit event.

The following table sets forth the notional value, fair value and maturity dates of credit default swap contracts as of December 31, 2014 and 2013, respectively (000s omitted).

2014								2013					
	High-yield		Emerging Markets		Investment Grade		High-yield		Emerging Markets		In	vestment Grade

Maturity date range	th	rough 2018	thr	ough 2019	thr	ough 2018	thr	ough 2018	thr	ough 2018	thro	ugh 2018	

Fair Value

The fair value of investments is reported using a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of inputs within the fair value hierarchy are described as follows.

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.
- Level 2 Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. This includes securities that are infrequently traded, derivatives, and mortgage backed securities.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement. This includes securities that are not actively traded on an established exchange, swaps, and partnership and direct investments.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Foundation has certain investments categorized as Level 3 where the inputs are not readily observable but the underlying assets are public investments.

The following tables set forth by level, within the fair value hierarchy, investment assets at fair value as of December 31, 2014 and 2013 (000s omitted). The unfunded commitments, which are not included in investments, represent contractual obligations for future investments.

The following tables set forth investment assets by the amount of time, including notice period and redemption period, in which the Foundation has the legal right to receive redemptions of its investments as of December 31, 2014 and 2013 (000s omitted). For investment assets with a redemption period greater than 365 days, the Foundation's capital is expected to be liquidated over a weighted average period of 3.5 years, ranging from 1 to 25 years, as of December 31, 2014, and over a weighted average period of 3 years, ranging from 1 to 14 years, as of December 31, 2013. The Foundation has certain investments classified as Level 3 where the Foundation has the right to give notice and exit the investments if the investments have sufficient liquidity available. These investments are categorized with a redemption period of 90 days or less.

December 31, 2014 and 2013

Investment Assets by Redemption Periods as of December 31, 2014

December 31, 2014 and 2013

4. Excise and Income Taxes

Excise and income taxes provided for in the financial statements for the years ended December 31, 2014 and 2013, include the following components (000s omitted):

	<u>2014</u>	<u>2013</u>
Federal excise taxes:		
Current	\$ 6,211	\$ 10,039
Deferred taxes included in unrealized appreciation	(2,951)	(5,500)
Total federal excise taxes	3,260	4,539
Federal and state income taxes:		
Current	(367)	385
Total excise and income taxes	\$ 2,893	\$ 4,924

5. Commitments and Contingencies

Guarantees

The Foundation enters into guarantees to support its grant making programs. Total outstanding guarantees were \$24.7 million and \$24.0 million as of December 31, 2014 and 2013, respectively. Guarantees approved but not yet closed totaled \$1.5 million as of December 31, 2013. There were no guarantees approved but not yet closed as of December 31, 2014. The Foundation records a liability if it is more likely than not a guarantee will be called and the expected amount to be called can be estimated. These liabilities totaled \$5.7 million and \$7.1 million as of December 31, 2014 and 2013, respectively.

Line of Credit

The Foundation has a \$250 million unsecured committed line of credit carrying an interest rate of either LIBOR plus 45 basis points or Prime. The Foundation has no notes outstanding as of December 31, 2014 and 2013.

Legal Actions

The Foundation is involved in several legal actions. The Foundation believes it has defenses for these claims, believes the claims are substantially without merit and is vigorously defending the actions. In the opinion of management, based on advice of legal counsel, the final disposition of these matters is not expected to have a material effect on the Foundation's financial statements.

6. Subsequent Events

Management has determined that no material events or transactions, which require adjustments or additional disclosures in the Foundation's financial statements, occurred subsequent to December 31, 2014, and through June 10, 2015, the date the Foundation's financial statements were available to be issued.
